OVERVIEW

Professional drone inspections using high-resolution and telephoto imaging — no scaffolding, MEWPs or working at height. Every finding is geo-tagged, annotated and cross-referenced in a clear, structured written report.

WHAT'S INCLUDED

Zoom & Detail Imaging

Close-up inspection stills of defects, joints, welds and interfaces.

Geo-Tagged Findings

Every issue pinned to the site map so it can be re-inspected easily.

Structured Reports

Severity ratings, annotated imagery and recommended actions.

Zero-Access Working

No scaffolding, MEWPs or rope access for the vast majority of inspections.

Repeat Inspections

Return visits reference the previous baseline so change is tracked.

Fully Compliant

CAA-authorised, insured, site-specific RAMS on every visit.

BENEFITS TO YOUR PROJECT

- Safer inspections — nobody at height or in the live plant zone.
- Faster turnaround — hours instead of days of access set-up.
- Lower cost — no scaffolding, MEWPs or lane closures required.
- Earlier issue detection with high-resolution imagery.

IDEAL FOR

Bridges, culverts, retaining walls, embankments, roofs, chimneys, masts.
